

# Waterproofing Series Diamond Master Supreme

**DIAMOND MASTER SUPREME** Our advanced formula combines salt component chemicals and crystalline materials to deliver unparalleled protection. Upon application, it effectively prevents damage from minerals. Special chemical components react with moisture in concrete, cement-based materials, lime, and other substances, initiating a catalytic reaction. This process creates intricate, long-chained crystallized shapes and structures within pores and cracks.

Once hardened, the coating layer resists corrosion from various salts, alkalies, and seawater, ensuring enduring protection for your surfaces. Trust **DIAMOND MASTER SUPREME** to safeguard against the elements with superior efficacy.

## PRODUCT FEATURES

**Excellent Waterproofing.**  
Superior waterproofing.

**Prevent hairline cracks smaller than 0.4mm**

**Anti-Alkali Properties**  
Protection against efflorescence.

**Anti-Fungus properties.**  
Protection against fungus and algae.

**Environmentally Friendly**  
Low VOC.  
Energy savings.

**Hassle-Free Application**  
Easy application with roller or brush.

## USAGE AREA

**PUBLIC AREA**

**BASEMENT CARPARK**

**EXTERNAL WALL**

**WATERPROOFING CONSTRUCTION**

## APPLICATION METHOD

### Surface preparation:

Ensure substrate is clean and free of dust, dirt, oil, grease, paint, curing compound, concrete sealers, loosely bonded toppings and any other substances that may prevent or reduce adhesion. If the substrate contains these substances, they must be removed. All cracks and hollow spots must be addressed and repaired.

### Application method:

1. Apply Diamond Master Supreme directly with mixing ratio of 2:1 (2 part of powder with 1 part of water).
2. Apply 2 layers of Diamond Master Supreme.
3. The mixed product must be applied and completed within half an hour to prevent hardening. Once hardened, the product cannot be reused.

### Product Details:

1. Packaging Weight: 5 KG
2. Coverage: 25-28m<sup>2</sup>/2layers
