**Karara Stone**  
Rough | Smooth

# Architectural Series

# Karara Stone

Karara Stone is a new-generation architectural coating formulated with a water-based silicone-acrylic emulsion as its core binder, enhanced with premium imported additives.

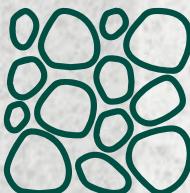

Through advanced processing technology, it accurately replicates the natural texture and veining of real granite.

It offers lightweight safety performance, strong artistic expression, and easy application, providing a high-quality decorative solution for a wide range of building walls.

## Product Features

Lightweight

Natural Stone Texture

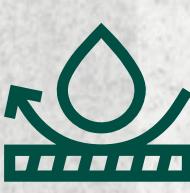

Long-Lasting & Durable

Seamless Design

## Application Process

### **Substrate Preparation**

Thoroughly clean the wall surface, repair cracks and depressions, and ensure the substrate is level, firm, and free from loose areas. Strictly control substrate moisture content  $\leq 9\%$  and pH  $\leq 10$  to ensure stable adhesion for subsequent coatings.

### **For Karara Stone - Rough (Wall)**

**Primer :** Evenly apply 1 coat of Nano Primer.

**Karara Stone Main Coat :** Use a trowel to apply 2 coat of Karara Stone main material at  $2.2-2.5 \text{ kg/m}^2$ , maintaining a dry film thickness of 0.6-0.8 mm. Allow drying for 6-8 hours between each layer.

**Tocoat :** Evenly apply 2 coat of topcoat clear.

### **For Karara Stone - Smooth (Tabletop)**

**Primer :** Evenly apply 1 coat of Diamond Primer.

**Karara Stone Main Coat :** Use a trowel to apply 2 coat of Karara Stone main material at  $2.2-2.5 \text{ kg/m}^2$ , maintaining a dry film thickness of 0.6-0.8 mm. Allow drying for 6-8 hours between each layer. For smooth finished sand lightly using 300-320 grit sandpaper to achieve a fine, smooth surface, improving adhesion and overall uniformity for the finishing coat.

**Tocoat :** Evenly apply 2 coat of topcoat clear.

**Packaging :** 25kg/pail
