Pebble Stone

Step into a space shaped by texture and quiet natural elegance. Pebble Stone brings together carefully selected mineral aggregates and refined finishing techniques, creating a surface that feels both grounded and sophisticated. With its subtly exposed stone texture, it introduces depth, movement, and a tactile richness that elevates any environment.

Each application of Pebble Stone reveals a unique composition of tones and grains, forming a surface that is never entirely uniform, yet always harmonious. The interplay of light across its textured finish enhances its natural character, making walls and floors feel more alive, more dimensional, and visually engaging without overwhelming the space.

Inspired by the organic beauty of nature, Pebble Stone carries a calm, earthy presence that blends effortlessly into both modern and natural settings. Whether used to soften contemporary interiors or to enrich outdoor landscapes, it offers a balanced aesthetic that feels authentic, timeless, and quietly expressive.

With Pebble Stone, surfaces become more than just finishes—they become part of the spatial experience. It invites a sense of connection to natural materials while maintaining a refined visual identity, allowing every project to reflect a subtle yet confident sense of design.

Pebble Stone

MOKAY® Pebble Stone is a textured decorative finish blending natural mineral aggregates and resin to create rustic, organic surfaces through precision troweling that highlights raw stone aesthetics and natural sheen.

Application Steps

- 1 Inspect the substrate.
- 2 Apply 1 coat of Pebble Stone special primer by roller.
- 3 Apply Pebble Stone evenly and trowel it flat once. Allow at least 24 hours for complete drying.
- 4 Apply a high-gloss topcoat to enhance shine and protect the surface.

Packaging Details

Pebble Stone Primer	: 0.2 KG/m ²
Weight	: Part A 1.5 KG ; Part B 25 KG
Coverage (2 - 4 mm)	: 5 - 10 KG/m ²
Coverage (3 - 5 mm)	: 10 - 15 KG/m ²
Pebble Stone Topcoat	: 0.5 KG/m ²

* The dosage varies depending on the thickness.

Notes

- The special primer is a two-component system (Part A and Part B) and should not be diluted with water.
- Pebble Stone should not be diluted with water. Mix Part A and Part B thoroughly before application.
